

## FAI CIAM

### F5 RC Electric Subcommittee Report 2024

During 2024 F5 Subcommittee deal with few minor changes in the F5J and F5K rules. F5B rules had no changes.

BaseCamp tool was well used for communication with Sc members but also with invited experts.

F5B had successful 2024 World Championship in Maricopa, Arizona USA with very less participants - 23 from 7 nations included wild cards pilots.

F5J European Championship in Deva, Romania, was successful with 63 senior and only 16 junior participants from 23 nations. 2022 F5J European championships in Szeged, Hungary had 72 seniors and 25 juniors. Internal problems in Romanian federation was part of reasons for less participation, but we must try to find way to attract more junior participants.

F5J World Cup going well, but not grow with 23 valid events for 2024, 1219 participations from 30 countries, near the same numbers as 2023.

2024 F5 Electric Subcommittee has 15 members.
