

AGENDA ITEM 9.4b

JUDGES RANK INDEX SUMMARIES (2003-2010)

CIVA maintains a database of Rank Indexes for all Judges in spreadsheet form for the years 2003 onward. ACRO was introduced in FAI Aerobatic Championships in 2008 along with its excellent judging analysis reporting. Previous to 2008, judging analysis was provided by ACMS. These spreadsheets were created and are maintained by Steve Green. Steve has been excellent in providing information in any form CIVA and its Sub-Committees wish.

The reports attached are of various types and are for both Power and Glider (when applicable):

- RIs with Programme Q Included
- RIs with Programme Q Deleted
- RIs with Programme Q Included if Q Used in Final Results

Since 2006, only two FAI Aerobatic Championships (Power) have been required to use Q results in the final results and official standings. This is only done when a Championships experiences delays, usually due to bad weather, and only Programmes Q and 1 are completed. A valid Championships can then be declared on the basis of these two programmes.

These two competitions were AWAC 2006 in Radom and WAC 2009 in Silverstone. All other Championships excluded Q in the final results.

Glider Championships results always include the Known (Programme 1).

While these reports include data from 2003, it is CIVA policy the last five years be considered in judge selection.

In addition, John Gaillard, as Chairman of the Judging Sub-Committee, prepares a ranking list which is used by the Sub-Committee in deciding which Judges will receive invitations to serve as "CIVA Judges" (the group of 7 on each panel). Extra slots (up to 3) are filled by "Invited Judges". These are usually new Judges who do not have an international RI history or who are attempting to improve their performance.

The purpose for providing CIVA with these reports is to ask for policy guidance regarding which data should be used. There are varying opinions on this within the Sub-Committee as well as other people who have been consulted. Up until now, RI data with Q excluded (except for the two contests above) have been used. Therefore, this question has been placed on the Agenda for the plenary.
